Profile:

Goodhart is an innovative education tech platform built around the principles of “Goodhart’s Law”, the idea that when a measure becomes a target, it ceases to be a good measure. Rather than focusing strictly on traditional scores and grades, the platform analyzes how students learn and think. It tracks behaviors like how long they spend on a concept, when they change their minds, and what they go back to reread, offering teachers and students a deeper understanding of true concept mastery.

Profile:

ZenVed is a practitioner-led deep-tech EdTech company based in Mangaluru, Karnataka. It trains engineering students and working professionals in Artificial Intelligence and drone technology through programmes such as AI Infinity, AeroAI Bootcamp and AI Ready. ZenVed partners with engineering colleges to conduct drone workshops and AI hackathons, and to establish Centres of Excellence in AI and Drone Technology on campus. Learners work on real-world projects under industry mentors, with internship opportunities. Through its incubation centre, ZenVed also supports student startups with mentoring and seed funding.
